Crown welcomes  
Bryan Hewes  
as VP of Sales

*The Crown Veneer Family would like to extend our thanks to everyone who helped make 2007 a successful year. From our family to yours, we wish you good health and prosperity in the New Year.*

### **OUR FUTURE IS TODAY WITH FSC**

Our future resources are dictated by the way we manage them today. **Forest Stewardship Council (FSC)** has quickly become one of the most recognized companies focused on maintaining our forests. The standards they have set forth will help to sustain and ensure a stable ecosystem with an economic value for future generations.

Crown Veneer Corp. takes great pride in being a fifth generation company and we are doing our part to secure the future of our natural resources. At the present time we have several species available with the FSC certification: **Ash, White Oak Rift, Fumed Red Oak, Sycamore, and Beech** (please contact us for availability on all species). We are very optimistic about the future and will continue to support the efforts of FSC.

### **FUMING**

Fuming is a process in which wood is placed in a modified kiln dryer where it is “smoked” with an ammonia treatment. “Smoking” gives the wood a chocolate brown or black color (see picture on left) and it makes the wood more elastic.

### **WHAT'S NEW**

We are looking forward to having a new, faster grading line in our warehouse for the spring of 2008.
